## Funding March of Dimes...

About 380,000 babies are born too soon each year. We are partnered with March of Dimes to change that and help more moms have full-term pregnancies and healthy babies.

From polio to prematurity the March of Dimes has focused on researching the problems that threaten our children and finding ways to prevent them. Discover more about our mission at [www.MarchofDimes.org](http://www.MarchofDimes.org).

## Funding Robbie Page Memorial...

"Items have been placed in several hospital units where infants and toddlers may be staying as inpatients, with a goal of filling gaps in areas where similar products were not available. Again, many thanks for helping ACH's Child Life team better serve the developmental needs of hospitalized infants and toddlers. Your philanthropy is addressing an important need and making an impact." said Alison Caballero, Senior Development Officer for Arkansas Children's Hospital Foundation

## Funding UIFI Scholarships...

"UIFI was an incredibly uplifting experience. It gave me the knowledge, tools, and encouragement to better myself, chapter, and Greek community as a whole. It showed me a very real sense of Greek unity and also empowered me to do more and be more."

said Angel McDaniel, Alpha Omicron

Carys Fritz, Epsilon Omicron.*

## Funding Graduate Scholarships...

"I received a Foundation scholarship while finishing my Master's degree and completing a required 6-month residency in my career field. Without the support of the Tri Sigma Foundation, my educational experience would have been compromised. Supporting the Foundation today is my way of giving back to future leaders. These phenomenal programs truly prepare our women to be dynamic leaders with strong character, and I am humbled to be part of that." said Jessica Dowches-Wheeler, Zeta Lambda
